

AKASH SOMASUNDARAN

SENIOR DATA ANALYST | MSC BUSINESS ANALYTICS CANDIDATE

Manchester, UK | akashnair1307@gmail.com | +44 7946 388709 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

*Student visa valid until 30 January 2027. Eligible to work full-time after course completion, subject to Student visa conditions. Planning to apply for the Graduate visa route after completing my MSc if sponsorship is not offered. Eligible as a New Entrant under the Skilled Worker route, reducing the applicable salary threshold to £33,400 where role requirements are met. No relocation support required.

SUMMARY

Senior Data Analyst with 2+ years of startup experience applying analytics, business intelligence, predictive modelling, and cloud-based data solutions to solve business problems across BFSI, fintech, QSR, CPG, and healthcare insurance. Experienced in working independently, owning client-facing projects, analysing complex datasets, and translating technical findings into practical recommendations for business stakeholders. Currently finishing an MSc in Business Analytics at The University of Manchester and seeking Data Analyst opportunities from September 2026.

SKILLS

Core Analytics: SQL, Python, Excel, R, data cleaning, exploratory analysis, KPI reporting, hypothesis testing

BI & Visualisation: Power BI, Tableau, Amazon QuickSight, Streamlit

Data Engineering: ETL, data pipelines, data lakes, AWS S3, Glue, Lambda, DMS, Redshift, Athena, Databricks SQL

Machine Learning: Regression, classification, forecasting, decision trees, random forests, gradient boosting, model evaluation

GenAI & Cloud: Azure OpenAI, Cognitive Search, AI Document Intelligence, LangChain, Docker, Git

Workplace skills: Ownership, independent working, cross-functional collaboration, leadership, stakeholder management, clear communication, analytical problem-solving, adaptability

PROFESSIONAL EXPERIENCE

Senior Data Analyst, Ganit Business Solutions Pvt Ltd

Jun 2023 - Aug 2025

- **Developed 2 Power BI collection dashboards** for home-loan and credit-card portfolios, replacing fragmented Excel reporting and **reducing recurring report preparation time by approximately 60%.**
- **Improved debit transaction-routing accuracy by 7%** for a fintech client by analysing payment-gateway performance, identifying faulty routing logic, and supporting rule and model enhancements.
- **Designed a centralised AWS data lake** integrating data from 3 source types, including MSSQL, Dynamics 365, and flat files, automating daily reporting pipelines and **reducing manual data preparation by approximately 15 hours per week.**
- **Built an HR document chatbot** for a CPG client to help HR teams retrieve information from lengthy policy and internal documents, **reducing document-search time by an estimated 40%** and enabling faster responses to employee queries.
- **Developed a healthcare insurance chatbot** to compare tariff and claim rates across policy documents, **reducing manual comparison effort by an estimated 50%** and enabling faster identification of pricing differences.
- Supported the Generative AI Centre of Excellence by **contributing to 10+ proposals, client demonstrations, and proof-of-concepts**, helping leadership translate emerging AI capabilities into practical commercial use cases.
- **Conducted a text-to-image research project** for a CPG marketing team, testing **100+ prompt and creative-output variations** to assess the suitability of generative AI for campaign ideation and content development.

PROJECTS

- **THI Territory Growth Dashboard:** Built a Streamlit dashboard for a UK construction firm's 2027 sales strategy, applying an AHP-based scoring framework to rank territories by growth opportunity, customer acquisition potential, and retention health.
- **Sweet Buzz Gelato Marketing Mix Model:** Developed an R-based regression model to evaluate the impact and cost-effectiveness of television, banner, and in-store promotions, producing next-month sales forecasts to support marketing budget allocation.

- **FindMyUniAccommodation:** Built a Streamlit decision-support application to help students compare Manchester neighbourhoods using rent, commuting costs, travel time, grocery access, safety, and distance to university. Developed a weighted affordability score and interactive recommendations using a synthetic MVP dataset.
- **Emergency Department Scheduling and Patient Flow App:** Developed a Python and Streamlit application for an NHS hospital, combining Gurobi optimisation with Random Forest modelling to test staffing scenarios and predict potential breaches of the four-hour emergency department target.
- **France vs Spain Match Prediction:** Built a CatBoost classification model using historical match results, recent form, goalscoring performance, knockout-stage records, and ELO-based features, correctly predicting Spain's victory over France.

EDUCATION

MSc in Business Analytics: Operational Research and Risk Analysis

Sep 2025 - Sep 2026

Alliance Manchester Business School, The University of Manchester

- **Dissertation: Developing a bed-capacity analytics framework for an NHS hospital** to model occupancy pressures, identify the operational factors contributing to bed shortages, and support **proactive capacity-planning decisions using FRAM/FRAIXL, simulation, and predictive analytics.**
- **Relevant Modules:** Data Strategy; Machine Learning for Business; Applied Statistics for Business Forecasting; Mathematical Programming and Optimisation; Python Programming.
- **Recipient of the Global Futures Scholarship.**

B.E. in Aeronautical Engineering

Jun 2019 - Apr 2023

Madras Institute of Technology, Anna University

CGPA: 8.94/10, First Class with Distinction

Vice President, Anna University Students Entrepreneurship Club | Placement Representative, MIT Aeronautical Engineering | Website Manager, FLIGHT National Aerospace Symposium

A-level equivalent, CBSE Class XII: 95.8%

May 2019

GCSE-level equivalent, CBSE Class X: 10.0 CGPA

June 2017

CERTIFICATIONS

- Databricks Certified Data Analyst Associate
- AWS Partner: Generative AI Essentials
- The Complete QuickSight Course 2022: From Zero to Expert
- Machine Learning, Tata Steel

ADDITIONAL INFORMATION

- **Languages:** English, Tamil, Malayalam, Hindi; basic French
- **Awards:** First Prize, Chintha 2021 Debate Competition, University of Madras | Second Runner-Up, National-level Spartan Spelling Bee 2017
- **Volunteering:** Care and Welfare COVID Awareness Team | Medito Foundation audio quality-checking volunteer
- **Interests:** Regular parkrun participant | Writing data science and technology articles on Medium
