

AKASH SOMASUNDARAN

SENIOR DATA ANALYST | MSC BUSINESS ANALYTICS CANDIDATE

akashnair1307@gmail.com | +44 7946 388709 | www.linkedin.com/in/akash-somasundaran0713

*Student visa valid until 30 January 2027. Eligible to work full-time after course completion, subject to Student visa conditions. Planning to apply for the Graduate visa route after completing my MSc if sponsorship is not offered. Eligible as a New Entrant under the Skilled Worker route, reducing the applicable salary threshold to £33,400 where role requirements are met. No relocation support required.

SUMMARY

Senior Data Analyst with 2+ years of startup experience delivering analytics, BI, data engineering, and GenAI solutions across CPG, QSR, healthcare insurance, BFSI, and fintech. Skilled in Python, PySpark, SQL, Power BI, and selected AWS/Azure services for data pipelines, BI reporting, machine learning workflows, and GenAI applications. Experienced in working with leadership teams on proposals, client demos, solution design, and stakeholder-facing analytics initiatives. Currently pursuing an MSc in Business Analytics at The University of Manchester, with a strong interest in descriptive, diagnostic, and predictive analytics. Seeking data roles from September 2026.

TECHNICAL SKILLS

Programming & Analytics: Python, PySpark, SQL, R, Excel

BI & Visualisation: Power BI, Amazon QuickSight, Tableau, Streamlit

Cloud & Data Engineering: AWS S3, Glue, Lambda, DMS, Redshift, EMR, Athena, SNS, SageMaker; Azure OpenAI, AI Document Intelligence, Cognitive Search, Blob Storage

Machine Learning & GenAI: Regression, classification, forecasting, decision trees, gradient boosting, neural networks, prompt engineering, LangChain, GenAI application development

Tools: Databricks SQL, Docker, Git, Gurobi

PROFESSIONAL EXPERIENCE

Senior Data Analyst, Ganit Business Solutions Pvt Ltd

Jun 2023 - Aug 2025

- Built GenAI Q&A chatbots for CPG and healthcare insurance clients to reduce reliance on manual review of complex policy, product, and business documents, using Azure AI Document Intelligence, Azure OpenAI, Cognitive Search, LangChain, Python, Streamlit, and Docker to improve document retrieval and stakeholder access to information.
- Designed a centralised AWS S3 data lake and automated reporting pipelines for a QSR client facing fragmented operational data across MSSQL, Dynamics 365, and flat files, using DMS, Glue, Lambda, Athena, SNS, and QuickSight to create structured KPI reporting and improve operational visibility.
- Delivered Power BI and Redshift-based collection summary reports for BFSI stakeholders who needed clearer monitoring of home loan and credit card collections, transforming raw collections data into insight-led dashboards for portfolio tracking, performance review, and business decision-making.
- Improved debit transaction routing accuracy by 7% for a fintech client by investigating payment gateway performance issues, conducting root-cause analysis, and supporting model/rule enhancements to improve transaction success routing.
- Supported leadership teams in the Centre of Excellence for Generative AI by preparing proposal decks, client demos, proof-of-concepts, and solution design material, helping translate emerging GenAI capabilities into practical client-facing business use cases.
- Conducted a text-to-image research project with marketing stakeholders of a CPG firm to explore AI-generated content opportunities, using MidJourney and prompt engineering to test creative outputs and assess how GenAI could support marketing ideation and campaign development.

ACADEMIC PROJECTS

- THI Territory Growth Dashboard:** Built a Streamlit proof-of-concept dashboard to support a leading construction firm's 2027 sales strategy by translating a Territory Health Index into territory-level recommendations. Applied an AHP-based scoring framework to rank UK territories by strategic opportunity, growth potential, and retention health, helping support account manager deployment, customer acquisition, and retention decisions.

- **Emergency Department Scheduling and Patient Flow App:** Built a Python and Streamlit analytics app to optimise emergency department employee scheduling and predict 4-hour target breaches. Used Gurobi-based linear optimisation to test staffing scenarios and a Random Forest model to forecast potential breaches, supporting workforce planning decisions under operational constraints.
- **Sweet Buzz Gelato Marketing Mix Model:** Built a marketing mix model in R to help evaluate the effectiveness of FMCG marketing spend across international markets. Used linear regression to quantify the impact and cost-effectiveness of TV, banner, and in-store promotions, producing next-month sales forecasts to support marketing budget allocation decisions.

PERSONAL PROJECTS

FreshOps: Built a Streamlit app to reduce fruit and vegetable waste by planning weekly consumption around quantity and shelf life. Used PuLP-based optimisation logic to allocate produce across the week while respecting expiry constraints, helping users make practical grocery decisions and avoid unnecessary spoilage.

EDUCATION

MSc in Business Analytics: Operational Research and Risk Analysis

Sep 2025 - Sep 2026

Alliance Manchester Business School, The University of Manchester

Relevant areas: Descriptive, diagnostic, and predictive analytics, data strategy, risk analysis, decision modelling, business intelligence.

B.E. in Aeronautical Engineering

Jun 2019 - Apr 2023

Madras Institute of Technology, Anna University

CGPA: 8.94/10, First Class with Distinction

Vice President, Anna University Students Entrepreneurship Club | Placement Representative, MIT Aeronautical Engineering | Website Manager, FLIGHT National Aerospace Symposium

Higher Secondary and Secondary Education, CBSE Curriculum

2016 - 2019

SBOA School & Junior College

Class XII: 95.8% | **Class X:** 10.0 CGPA

Class Leader | Assembly Speaker | Student Volunteer, SBOANZA Inter-School Cultural Fest

CERTIFICATIONS

- Databricks Certified Data Analyst Associate
- AWS Partner: Generative AI Essentials
- The Complete QuickSight Course 2022: From Zero to Expert
- Machine Learning, Tata Steel

ADDITIONAL INFORMATION

- **Languages:** English, Tamil, Malayalam, Hindi, French
- **Awards:** First Prize, Chintha 2021 Debate Competition, University of Madras | Second Runner-Up, National-level Spartan Spelling Bee 2017
- **Volunteering:** Care and Welfare COVID Awareness Team | Medito Foundation audio quality-checking volunteer
- **Interests:** Blogging, vlogging, fitness
